

LVTIMBER

SAUNA WOOD FROM LATVIA

High-quality materials for
sauna – wall panels and
bench boards.

LV TIMBER

LV TIMBER is timber processing company from Latvia. We focus on Aspen (*Populus tremula*) and Alder (*Alnus glutinosa*) material production. We provide a full cycle of production, starting with sawing logs, drying, edging and cross-cutting timber and finishing with planing the material to certain wall panel and bench profiles.

The main products are: high quality planed profiled materials, finished materials for sauna and sawn timber of different dimensions.

We build our reputation on the quality of our products, the reliability of our supply and our individual approach to each customer.

The factory is located in the North East of Latvia, in Smiltene region, 150 km from Riga.

PACKAGING

Package

PVC shrink film

Pcs per pack:

Wall panels

6 pcs/pack

Bench boards (28 - 120 mm)

4 pcs/pack

Bench boards (140 mm)

3 pcs/pack

ASPEN AND ALDER

Used in conditions of high temperature and humidity

Does not emit resin

Have a natural anti-fungal and insect protection that reduces the risk of wood damage such as mold or wood pests

Has a smooth texture, providing a comfortable seating surface

Suitable for people with more sensitive skin or respiratory problems

Able to effectively retain heat and reduce energy losses

Has a mild and pleasant scent, adding to the overall sensory experience in the sauna

Easy to process, which facilitates installation work, ensuring a convenient assembly process

Less likely to cause allergies

Full-cycle production

LV TIMBER

Smart. Green. Sustainable. Our story

1.

Roundwood procurement

Sustainable sourcing from local forests – reduces transport distances, lower CO₂ emissions.

We support sustainable forestry and the local economy.

2.

Efficient primary processing

Wood is carefully sorted using modern scanners and technical knowledge.

Precise cutting and drying reduce material losses.

We use energy-efficient equipment to ensure high quality and minimize environmental impact.

3.

Final product manufacturing

We use only selected boards to produce high-quality sauna finishing materials.

Each board is quality-checked using technologically and manually methods.

We ensure consistent, stable quality for customers worldwide.

4.

Zero-waste wood processing

All production leftovers are used for packaging or further processing.

Sawdust and wood chips are processed into heat energy or pellets.

We use 100% of each log – every part of the log finds a purpose.

5.

Energy-efficient production

Our facility is heated using self-produced wood chips.

We reduce external energy costs and our ecological footprint.
